

Many of your neighbours  
who live in your town or city  
and many more  
from across the country  
and an even larger number  
from around the world  
are asking you to join us  
as we draw this line in the sand.

We are asking you  
to not comply with any form  
of digital Id, including a vax pass,  
and not agree  
to a monetary system with the name  
Central Bank Digital Currency.

Many of us believe  
that all aspects of our way of life  
that we hold near or dear  
are at stake in this moment.

To see the progress we are making here in  
Canada, and around the world, please visit

[www.theworldresponds.com](http://www.theworldresponds.com).

There, you will also find a digital copy of this  
pamphlet.

Ps. This video might help connect some dots as  
to what is going on behind the scenes.

It is about 1 hour long.

It is called "Monopoly - Who Owns the World"

**A response to:**

**Vaccine Mandates,**

**Digital ID**

**and**

**Central Bank  
Digital Currency**

**HOPE.canada**

Firstly, there is a difference between a Digital ID and digitized information. Your driver's licence, your health card, and your credit cards

are all examples of digitized information. This has been around for as long as we have had home computers.

On the other hand,

a Digital ID is a platform

where all of your information is stored

- all your financial information,

all your health records,

all of your personal information.

This platform will have the ability

to know where you are,

where you have been,

which restaurants you ate in, and with whom.

It will know the content

of every email you write.

The country with the most advanced

technology in this regard is China.

Citizens there, especially those who are

protesting, are being locked down

by a change in their vaccine status

that is altered by a central computer system.

In Canada,

we have already had the experience

of people's bank accounts being frozen

by our government when citizens

dare to disagree with them.

This is a 17 minute video

that explains the dangers of this technology.

It is called "This Pivotal Moment". Episode 1.

<https://www.bitchute.com/video/GgHkYvDfDRH5/>

We must not let this happen here.

It has been a tough couple of years

here in our beautiful country, Canada.

We have been through a lot together.

And it seems like

we are not out of the woods yet.

There is more to come in the pandemic.

In fact, we are starting

to be able to predict the future.

At the recent G20 conference

held in mid-November 2022,

all 20 countries signed on to an agreement

to a return to vaccination mandates.

These mandates

will be part of a Digital ID platform.

Many of your neighbours

are concerned about this

and are distributing this pamphlet

far and wide in an effort

to start a national dialogue.

We all hear talk

of Central Bank Digital Currency (CBDC).

It is being marketed as safe and convenient.

This is simply another movement

towards global centralization

and is not in the interest of us as individuals,

or us as a country.

Here are some thoughts on the subject

from Edward Snowden.

"Your Money AND Your Life"

<https://edwardsnowden.substack.com/p/cbdcs>

Here is a dialogue about CBDC's.
